

Washington Oaks State Gardens

Bird Checklist

Washington Oaks State Gardens covers 400 acres extending from the Atlantic Ocean to the Matanzas River. The park has a variety of communities including beach, coastal scrub, coastal hammock and tidal marsh. The bird-life is quite diverse with shorebirds frequenting the beach; egrets, herons and ibis using the marsh areas along the Matanzas river, and warblers frequenting the oak trees in the hammocks. Some good places to bird are the beach crossover platform, the gardens and the Mala Compra hiking trail through the hammock to the picnic area. Make sure you take the paths out to the tidal marsh.

Acknowledgment- This checklist has been compiled from surveys at Washington Oaks State Gardens thanks to the Flagler Audubon Society and other volunteers who spent numerous hours surveying the park.

CATEGORIES OF ABUNDANCE OF SPECIES

- A Abundant means a species is so common that birders usually observe more than 25 individuals in proper habitat and season
- C Common means birders are likely to see 5 to 25 individuals daily in proper habitat and season
- F Fairly common means a species is common enough that birders should observe at least one individual daily in proper habitat and season
- U Uncommon species can be widespread but may not be observed by birders searching for it in proper habitat and season
- C Casual means a bird that wanders into North America at infrequent intervals and is not observed annually, but exhibits a pattern of occurrence over several decades
- R Rare can mean either that the species is widely distributed outside North America but exists in low numbers here, or that the entire population is small and local.

Habitat classifications (HAB)

- A AERIAL applies to birds most often seen in flight.
- B BEACH includes beach, dunes, and open ocean.
- C COASTAL SCRUB includes coastal strand and coastal scrub.
- G GARDENS are landscaped areas and formal planted gardens.
- H HAMMOCK is upland forest dominated by broadleaf trees.
- R RIVER includes river and its surrounding tidal wetlands.

These are general and sometimes broad categories.

Seasons: SP = Spring, SU = Summer, F = Fall, W = Winter

Birds, which are green highlighted, have not yet been reported; those in yellow have been reported but may be outdated.

FAMILY COMMON NAME SIGHTED SP SU F W HABITAT

Ducks, Geese, and Swans (Anatidae)							
	Canada Goose						
	Muscovy Duck
